Capacitors are hermetically sealed for long life. The 370V capacitors replace the following voltages in MFD equivalent ratings: 236V, 250V, 285V, 330V & 350V. The 440V line will replace the 460V capacitors as all Capacitors can withstand over voltages of up to 10% of rating.

REFRIGERANTS

ONE-STOP SOLUTIONS BUILT FOR PROS

If you are tired of messy dyes and sealants, we have the solution for you. By pre-blending 2 lbs. of gas with additives, our products are a smarter, mess-free way to work on a system.

From the ¼" service valve to the ability to service up to 6 tons of cooling, our convenient, resealable cans are a must-have addition for every truck, van, or shop.

While traditionally offered with R-22 and R410A refrigerants, orders can be customized containing any hydrocarbon or appliance-grade refrigerant.

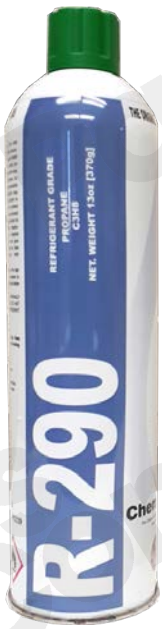

PCR22	R22 with UV Dye & Sealant
PCR410A	R410A with UV Dye & Sealant
PCCHG (4507)	Charging Hose with Gauge
PCUVL (4514)	UV Light
4200	2 lbs of R422 with dye & sealant
R32	2 lbs of R32
R404A	27.2 oz of R404A
R407C	27.9 oz of R407C
R134A	1.9 lbs of R134A

HYDROCARBON REFRIGERANTS

Hydrocarbon refrigerants are natural, nontoxic, and have no ozone depleting properties. They are more efficient than the HFC refrigerants that they replace. The improved system efficiency they produce reduces energy usage and life cycle costs.
